3) DOCUMENTARY LETTER OF CREDIT/DLC:

At Wealthouse Finance Ltd., we can offer assistance with import-export finance, specifically in the area of documentary letters of credit (LCs). LCs are a secure way to pay for foreign imports, but sometimes banks may not issue an LC if you don't have a credit line with them or if you've reached your credit limit.

We can help increase your LC capacity without affecting your existing bank lines. This means that even if your own bank can't issue an LC, we can still assist you in obtaining one. Additionally, we understand that capital can be tied up during the period when your supplier is producing the goods. We can provide capital to bridge this production time and commit funds only after the goods are produced.

By utilizing our services, you may only need to use your own capital for a short period when shipping documents are ready and need to be paid for. This allows you to free up your capital faster and increase the number of times you can turn it over. Your business volume may double or triple if you process more transactions.

While we can't create demand for your products, we can help you satisfy existing demand by providing the necessary financial solutions. If you're interested in leveraging import-export finance to improve your bottom-line credit facility, please contact us today and we will take care of the rest.

We look forward to partnering with you and assisting you in growing your import-export business.
